Evidence collected	2026-09-27 17:12:46 UTC (2026-09-28 01:12:46 SGT)
Deployed commit	9a86731043d4 on main (2026-09-28 01:05:30) · github.com/Darrenus/supplier-compare-agent
Host	AWS Lightsail, Ubuntu 24.04.4 LTS, 2 vCPU / 4 GB; up 3 days, 11 hours, 18 minutes
Stack	nginx 1.24 (port 80, rate limits) → gunicorn (2 workers × 4 threads) → Flask app; systemd unit supplier-agent with Restart=always
LLM	Claude Sonnet 4.5 through the course's LLM gateway (gateway_configured: true)
Result	Live checks 13/13 · demo scenarios 7/7 · server code = repository code (10/10 files) · CI green

3. Automated checks against the live site

`python scripts/check_live.py --base-url http://56.10.70.203`: pages, every endpoint, all 5 SKUs and the 400/404 error paths.

```

`python scripts/demo_scenarios.py --base-url http://56.10.70.203`: the demo scenarios with their expected winners, exclusions, injection flags and error codes.

```
=== SUMMARY: 7/7 scenarios passed against http://56.10.70.203 ===
[PASS] a) Baseline BRK-100, default weights
[PASS] b) Price-focused weights flip the winner
[PASS] c) Hard constraints exclude suppliers with reasons
[PASS] d) Prompt injection flagged, never wins
[PASS] e) Second SKU BRG-400: different winner and trade-off
[PASS] f) All suppliers excluded -> graceful empty result
[PASS] g) Bad input -> JSON 4xx error
```

4. Rate limiting on the LLM endpoint

nginx allows 6 LLM requests per minute per IP (bursts of 4) and 30 per minute site-wide, so the public site cannot drain the shared gateway. Seven rapid requests from one address:

```
404 404 404 404 404 429 429
HTTP/1.1 429 Too Many Requests
Retry-After: 60
{"error": "Too many requests from this address. Please wait a minute and try again."}
```

5. Continuous integration on main

GitHub Actions: pytest (122 tests) and the offline eval on Python 3.9 and 3.12, `nginx -t` with nginx 1.24, `bash -n` on the deploy scripts.

```
2026-09-27T17:05:33Z 9a86731 success Merge pull request #25 from Darrenus/eval/agent-choice-rerun
2026-09-27T07:58:02Z 0201020 success Merge branch 'feat/workspace-redesign'
2026-09-27T06:20:27Z db79a3b success Merge pull request #11 from Darrenus/docs/writeup-final
2026-09-27T06:20:09Z 33f124e cancelled Merge pull request #24 from Darrenus/docs/data-provenance
2026-09-27T06:19:53Z a228f12 cancelled Merge pull request #23 from Darrenus/feat/scale-synthetic
```

"cancelled" runs were superseded by a newer push to `main` (the workflow cancels an older run on the same branch); every completed run passed.
